

Camden Diabetes IPU
Camden Primary Care Diabetes Course 2018

The Diabetes IPU Team has pledged to ensure staff in each care setting are appropriately trained to deliver best care for their range of responsibilities. The focus is to increase the confidence and competencies of diabetes management in primary care, so that most patients can be successfully managed in primary care teams. This is fundamental as diabetes prevalence rises, and increasing numbers of people with more complex type 2 diabetes are repatriated into primary care.

The course is 3 days. It is ideal for GPs and Practice Nurses who are directly involved in delivering diabetes care for their patients.

Please note we are planning basic diabetes half day open to all other clinicians that will be available to book through the GP website.

To book a place please email your name, job title, place of your work and confirming that able to attend all days to diabetes.ckd@nhs.net

For more information contact Shantell Naidu (Diabetes Nurse Consultant Camden) via telephone 0203 758 2036 or above email or shantellnaidu@nhs.net
